

Our passion, vision and hobby is in developing sustainable timber products. We developed a unique Timber-Lock™ log home technology which offers superior insulation, stability and sustainability in cost effective, commercial and residential log buildings.

WFP Timber-Lock™ homes use a patented locking technology offering superior insulation, and stability. WFP can design homes, offices, commercial units, or multi-residential properties, using the new technology.

The cost effective and completely original system maximizes resource utilization over traditional timber home construction systems.

- Specialist providers of high quality Forest Friendly™ wood products sourced from sustainable British Columbia Forests.
- Over thirty years in the lumber business.
- Wide variety of lumber profiles, dimensions & finished products.
- Standard products or specialized personal design features.
- Timber-Lock™ homes with patented advanced lock design, optimizing insulation, stability and longevity.
- Cost effective housing systems, beautifully finished with timeless style.
- Perfect for luxury living, commercial units, offices, or multi property rental projects.

Forest Friendly™
Wood Solutions
Custom
Remanufacturing

Locally harvested, sustainably managed,
beautiful British Columbia Forest Products.

WFP Custom Remanufacturing

We specialize in custom remanufactured products, providing architects and contractors forest product solutions and adding benefits to all building projects.

Having supplied timber for many of Whistler's most luxurious, high end properties, we are happy to assist architects and contractors in choosing the best products for their clients. In addition to offering the most competitive rates, we take pride in explaining the aesthetics, durability, treatment plan and benefits of each product, adding specialist knowledge.

With over 30 years in the lumber business, we pride ourselves in being able to provide Forest Friendly™ wood solutions sourced from sustainably managed BC forests.

We specialize in custom remanufacturing products providing solutions and benefits across all sizes of projects. We source our beautiful wood products from sustainable BC forests.
